**Re: Indianapolis Power & Light Company (IPL) – Petersburg Generating Station
Source ID: 125-0002
New Source Review Post-Project Emissions Submission**

Dear Mr. Perry:

Indianapolis Power & Light Company (IPL) is submitting actual annual emissions data for Units 1, 2, 3, and 4 at IPL - Petersburg Generating Station, located at 6925 N. State Road 57, Petersburg, Indiana, pursuant to 326 IAC 2-2-8(b)(4) and 326 IAC 2-3-2(l)(4). (Attachment A)

IPL believes that the underlying projects were not major modifications and, therefore, are not subject to the New Source Review (NSR) program. In light of the uncertainty associated with the NSR program, however, IPL submitted notices to IDEM before implementing the work on each unit and IPL hereby submits this letter and report.

For NSR to apply, the emissions unit must undergo a “major modification”—a physical or operational change that results in an emissions increase. (326 IAC 2-2-2). A project that is routine maintenance, repair and replacement is, however, specifically excluded from the definition of major modification, irrespective of its impact on emissions. (326 IAC 2-2-1(ee)).

Because the type of work included in the notices is done routinely and the material costs are minimal for each of the projects, IPL concluded that NSR does not apply. These activities were not “major modifications” because they qualify as routine under the routine maintenance, repair and replacement exclusion. (326 IAC 2-2-1(ee)(2)(A)).

Nevertheless, since IPL submitted pre-project notifications, the company also is submitting the post-project annual emissions consistent with 326 IAC 2-2-8(b)(4).

Should you have any questions regarding this submittal, please contact Angelique Oliger at (317) 261-5852.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Oliger', followed by a long horizontal line extending to the right.
